PROFESSIONAL SUMMARY

An enthusiastic Information Technology undergraduate passionate about Software Engineering, Cloud Computing, and DevOps. With a strong interest in automation, scalable systems, and cloud-native technologies, I enjoy building practical solutions to real-world challenges. Driven by curiosity and continuous learning, I strive to develop reliable and impactful technology solutions.

TECHNICAL SKILLS

- Languages: Python, Bash, JavaScript, Typescript
- Backend: Node.js, Express.js
- Frontend: React, Tailwind CSS
- Databases: MySQL, PostgreSQL, MongoDB
- APIs & Integration: REST APIs, FAST APIs, Websockets
- DevOps & Tools: Linux, Docker, Kubernetes, Terraform, Jenkins, AWS, Git, GitHub, CI/CD

EDUCATION

University of Moratuwa **2024-Present**
BSc (Hons) in Information Technology (Currently Reading)
CGPA: 3.4/4.0 (Up to L2S1)

H/North Kanumuldeniya National School, Walasmulla **2008 - 2022**
G.C.E. Advanced Level
Z-Score: 1.7991 (Common Stream, Maths|Physics|ICT)

KEY PROJECTS

CloudSight - Observability platform **Nov 2025 - Present**

Collaborative cloud observability project for AWS-hosted applications.

- Built anomaly detection and incident management components for proactive monitoring of AWS-hosted applications.
- Implemented automated anomaly identification, severity classification, and incident tracking workflows.
- Designed scalable PostgreSQL schemas for telemetry, anomalies, incidents, and operational analytics.
- Technologies: Python, PostgreSQL, Node.js, Express.js, React, AWS.
- GitHub:https://github.com/dineTH2003-dev/observability-platform
- Live Demo :https://deployment.d2op20o2a3ztgl.amplifyapp.com/

AWS K3s OpenTelemetry Observability Lab **Jan 2026**

Hands-on cloud observability project demonstrating telemetry ingestion and distributed tracing in Kubernetes environments.

- Built a complete observability stack on AWS using K3s and OpenTelemetry.
- Implemented collection of logs, metrics, and traces from containerized applications.
- Configured telemetry export pipelines and visualized system behavior through Honeycomb dashboards.
- Explored SRE practices including monitoring, troubleshooting, and performance analysis.
- Technologies: AWS EC2, K3s, Kubernetes, OpenTelemetry, Honeycomb, Docker, Linux.

- GitHub:https://github.com/dineTH2003-dev/aws-k3s-opentelemetry-honeycomb-sre

Tunnix – Self-Hosted Developer Tunneling & Ingress Platform **2026-present**

Hands-on distributed systems and networking project focused on secure local port forwarding, high-concurrency tunneling, and remote ingress routing.

- Developed a production-ready developer tunneling platform as an open-source alternative to Ngrok, securely exposing local HTTP servers to the internet through bi-directional WebSocket frame multiplexing.
- Engineered a high-throughput Go ingress gateway and cross-platform CLI agent (`tunnix`) for low-latency request/response streaming and local port forwarding.
- Implemented a Bun/Hono control plane with SQLite (WAL mode), a 4-tier token security model, and a real-time React 18 dashboard for live tunnel telemetry and custom subdomain management.
- Technologies: Go (Golang), WebSockets, TypeScript, Bun, Hono, React 18, Vite, Docker, AWS (EC2, CloudFront, Amplify, S3), Nginx, Let's Encrypt SSL, SQLite.
- GitHub:https://github.com/dineTH2003-dev/Tunnix.git
- Live Demo**:** https://prod.d1jbmcf0n8m3v0.amplifyapp.com/

Ludo Game – IoT-Based Smart Board Gaming Platform **Sep 2025**

Hands-on IoT and full-stack development project focused on integrating embedded hardware with web technologies to create an interactive smart gaming experience.

- Developed an IoT-enabled Ludo gaming platform that combines physical gameplay with real-time digital monitoring and game management.
- Technologies: ESP32, Arduino Mega, React, Node.js, Express.js, MongoDB, REST APIs, IoT Systems, Embedded Programming, Git.
- GitHub:**https://github.com/dineTH2003-dev/Ludogame**

CERTIFICATIONS

- CCNA(Reading)
- Supervised Machine Learning : Regression and Classification
- LFS101: Introduction to Linux
- Introduction to Python & Numpy

EXTRA-CURRICULAR ACTIVITIES

- Batch Representative – B23, Faculty of Information Technology, University of Moratuwa
- Senior Prefect H/North Kanumuldeniya National School
- Riseup Mora 2026 Programme Committee Member
- Member of Classical Music Society, University of Moratuwa
